

Liquidity Coverage Ratio

The Basel Committee on Banking Supervision (BCBS) had introduced the Liquidity Coverage Ratio (LCR) in order to ensure that a bank has an adequate stock of unencumbered High-Quality Liquid Assets (HQLA) to survive a significant liquidity stress lasting for a period of 30 days. LCR is defined as a ratio of HQLA to the total net cash outflows estimated for the next 30 calendar days.

The Bank is required to maintain the LCR on a Standalone basis. The minimum LCR requirement set out in the RBI guidelines for the standalone basis is 100%.

The following table sets out the average unweighted and weighted values of the LCR components of the Bank. The simple average has been computed based on daily values for the three months ended 30th June 2023, 30th September, 2023, 31st December 2023 and 31st March 2024.

Bank's LCR comes to 129.92% based on the daily average position of past three months (Q4 FY2023-24). The position remained above the minimum regulatory requirement of 100%. Average HQLA held during the quarter was ₹ 29,065.80 crores with 100% being Level 1 Assets. Government Securities constituted 94.13% of Level 1 Assets and Cash in Hand/Excess CRR constituted 5.87% of Level 1 Assets. During the Quarter, the HQLA level (weighted value) has decreased by ₹ 1804.45 Crores. The weighted total net cash outflows (weighted value) increased by ₹ 2819.08 Crores mainly on account of increase in Non-operational deposits (all counterparties) and credit and liquidity facilities.

Bank liquidity management is guided by the ALM Policy and regulatory guidelines. The Treasury, which report to the Asset Liability Management Committee (ALCO), is authorized by the Bank's Board to develop funding strategies ensuring diversification and alignment with operational needs. ALCO's key decisions are regularly communicated to the Bank's Board. Apart from regular LCR reporting, the Bank prepares Structural Liquidity Statements on a daily basis to monitor its ongoing liquidity needs. The Bank has been maintaining HQLA mainly in the form of SLR investments over and above the mandatory requirements. Retail deposits are the main source of funding, offering significant diversification. Management believes the Bank possesses adequate liquidity to meet current and foreseeable short-term needs.
